

Moon Dough

How to make it:

The recipe calls for 1 part conditioner and 2 parts corn starch. (So you put 2 times as much corn starch in as you did conditioner.)

1. Pour your conditioner in a bowl. **We did one cup of conditioner.**

2. Put corn starch in. Little bits at a time. We started with one cup and then gradually added more. We ended up using a bit

more than **2 cups corn starch**. It all depends on what conditioner you use and the water consistency you had with it.

3. Stir the corn starch and conditioner until blended well

4. Put a 8-10 drops of food coloring. Ours was pretty light if you want it dark you will have to add a lot more drops.

5. Finish mixing with your hands.
